MUWANGUZI JOSHUA

• Junior Developer •

EDUCATION

2012 - 2016 • Jinja College
Ordinary Level (UCE)

PROJECTS

Personal Website

This is a full-stack, dynamic, and responsive web application.
- Django
- JavaScript
- HTML & CSS
- AWS S3 & Amazon SES

Source code: https://github.com/Joshuamjv2/my_djangoPortfolio
Live site: https://muwanguzi-joshua.herokuapp.com

Blog Website (Tutorial)

I did this project to put my Django Architecture knowledge to the test with a good User Experience end product in mind.
- Worked with a Relational Database to define relationships and performed optimized CRUD operations with the Django ORM.
- Got to work with Class-Based Views as a tool for swift development and better code readability and maintenance.
- Used some Django features like pagination, tagging, and slugs for a great User Experience.

Events Application (Tutorial)

This is an events management web application.
With this project, I learned the fundamentals of Django.

TECHNICAL SKILLS

Python	Bootstrap	GIt/Github
IHTML & CSS	Django	Microsoft Windows
JavaScript	SQL (MySQL)	

INTERESTS

Photography	Music
Coding	Movies
Reading	Football
